Medium term outputs Short term outputs Long term outputs (change in actions (change in knowledge) (change in opinions) 9. UMass reports 32. Policies that were 1. Umass / MAPC secondary data Includes questions for next phase identified as barriers doc review 26. Policy changes are Specific to communities 22. Increased consensus & are changed 17. Increase in the number of Demographics proposed momentum among municipal leaders educated MAPC projections municipal leaders & on transportation issues Previous municipal plans, 10. Municipal leaders receive outreach decision-makers re: walkability initiatives, policies Participate in forums 33. Identified sectorspecific policy changes Receive education via lobbying level improvements 27. Identified small / 2. CHNA meeting & conversations are implemented easy needs are with municipal leaders to educate 11. Representatives of local organizations & addressed ("low Ex. Buses re-routed and ask for buy-in 18.Increase in the number of community residents participate in hanging fruit") Ex. Transport community members and conversations at forums schedules adjusted 3. UMass Forums CBO reps educated on 23. Increased community w/ municipal leaders & CBOs transportation issues engagement Presentations re: age-friendly 12. MAPC reporting 28. Task forces More individual initiative, transportation Population specific created at municipal 34. Municipal budget people involved in Listening re: needs Includes scan of existing initiatives levels that includes allocated to transtransportation work Identifies community-level needs: by other stakeholders portation & system-4. MAPC/CHNA Focus Groups sectors, populations of focus, times of 19.CBOs, municipal leaders CBOs coordinate level investments are Focus on mobility-limited high need, destinations, & modalities and community members across made populations will get to know who else is municipalities • Ex. New modalities Integrating UMass forums data working on transportation • Ex. New bus routes 13. Specific needs identified issues, energy is generated Ex. "dispatcher" • Small, Ex.specific curb cutout locations 5. CHNA individual resident around the topic 29. Local • System- level barriers, ex, specific policies interviews organizations advocate for system 13a. New relationships initiated between 24. Increased CBO 35. Transportation is 6. Walk Boston Walk Audits improvements **CHNA & residents** involvement & easier for CML, system 20. Increase in public commitment runs faster, more conversation around 7. MAPC creation of often, more reliably 14. Centralized set of recommendations that 30. Local CBOs transportation (Participants **Transportation Tool** fully include resident voices produced / talk to non-participants) identify plan(s) to Design sprint disseminated by the CHNA push for improve-Tool is piloted ments in trans-36. Improved health portation systems outcomes for older 15. Info and messages disseminated via, eg 8. CHNA Communication / local press coverage adults and CML via coordination 21. Increased awareness 25. CML increase blog / social media / mass email reduced social Ensuring shared message among community residents, willingness / comfort to community forums 31. Increased isolation between partners especially CML, of use new transportation ridership increased access Coordinating timeline transportation options modalities to medical (Demonstrates need, Convening needed meetings 16. MAPC Transportation Tool is leading to increased appointments External communication disseminated to community members willingness of improved access (website, local media, social focusing on Community residents with to healthy food decision-makers to media, direct mail, mass email) Mobility Limitations (CML) invest)

Assumptions

- * Municipal leaders and CBOs will participate in forums
- * Municipal leaders and CBOs will agree that transportation is a priority
- * Political will to change will lead to budget allocations
- * It is clear and known which municipal leaders have a) potential to be convinced to help and b) power to create change.
